

My personal photographic journey started when, as a child my father gave me a camera and a projector so I could give slide shows of vacation adventures, family gatherings, and Newport scenery. In middle age I realized photography allowed me to expand my conscious experience of my surroundings to a poetic level. As a senior I'm studying the photographic process on a technical and philosophic level. My aim is to create well-crafted images that reflect what I felt when I pressed the shutter. Other hobbies include reading/ literary criticism, gardening and ballroom dancing.
